

Broadcast Networks Europe (BNE) is going from strength to strength in welcoming its new members Emitel (Poland) and Media Broadcast (Germany)

21/10/2015

BNE is the trade organization representing Terrestrial Broadcast Network Operators for Radio and TV in Europe, based in Brussels. BNE's [18 members](#) are operating in 21 European countries*.

BNE has taken an active part in the definition of the long term strategy on future use of the UHF band to ensure that the future of the Digital Terrestrial Television (DTT) platform and its importance to European consumers and the audiovisual sector are taken into account.

In view of the upcoming WRC 2015, BNE will continue to contribute actively to the policy debate on the future use of the UHF Band. It will seek to ensure that policy decisions maintain ease of access and plurality of content consumption for European citizens and sustain the dynamic and highly competitive market for audiovisual content creation.

Considering the important role that terrestrial broadcasting already performs in the EU, BNE notes that any process to develop the long term strategy of the UHF band on which DTT depends should have DTT at its core.

For more information on BNE's agenda and priorities, please contact Lars Backlund: lars.backlund@broadcast-networks.eu

Information about BNE membership benefits is also available [here](#).
